

Our local food system is a life cycle.  
This is the end-of-life care we currently provide.

# It's killing us.

Denver's not quite here, but we could be.

Matt Levin

## We have 12 years to limit climate change catastrophe, warns UN

Urgent changes needed to cut risk of extreme heat, drought, floods and poverty, says IPCC

[Overwhelmed by climate change? Here's what you can do](#)

SUSTAINABILITY

## Only 60 Years of Farming Left If Soil Degradation Continues

Generating three centimeters of top soil takes 1,000 years, and if current rates of degradation continue all of the world's top soil could be gone within 60 years, a senior UN official said

Food waste shouldn't go to waste!

# Soil Cycle makes composting convenient.

With Soil Cycle, your food waste gets recycled into compost at a network of urban farms and gardens that donate a portion of their harvest back into CSFR's anti-hunger programs.

That's how we starve the landfill and feed ourselves.
