Looking To Our Future: Pikes Peak Region 2030 (2012)

SUSTAINABILITY IN PROGRESS

Peak Alliance for a Sustainable Future was born out of the creation of the 2012 Regional Sustainability Plan. Peak Alliance's mission is to promote regional sustainability and advance the PPR2030 through regional collaboration and outreach. One of the main outreach programs is the monthly Sustainability in Progress event held at the IvyWild School in Colorado Springs. The Sustainability in Progress or SIP as they have become known, feature speakers on the many different aspects of the sustainability plan. The events take place the third Wednesday of each month. These morning meetings are an opportunity for community members, business leaders, and others to come together and learn about various aspects of sustainability in our community.

AGRICULTURE

AGRICULTURE

By 2030, regional farmers and producers have the opportunity to make their livelihoods in agriculture, while providing safe, quality food to the region's consumers, protecting agricultural lands to the maximum extent possible, and contributing to the health and stability of their communities.

- Adopt alternative means to preserve and conserve agricultural water....
- Preserve high-value, food-producing land...
- Help farmers and ranchers stay on the land by supporting their efforts to sustainably produce good, healthy food and market it...
- Make certain that the region's residents have access to healthy, affordable, local food, opportunity to grow it themselves..., and are supplied with specific educational programs on nutrition and healthy food choices.

ARTS AND CULTURE

The vision of PPR 2030 is to develop, enliven, enhance, and promote arts, culture, and the creative industries in the Pikes Peak region to benefit residents, visitors, the cultural sector, and the business sector.

- The region offers a diverse and broad range of arts, cultural, and entertainment activities and events. These events contribute to the local economy.
- The region's arts scene draws innovative companies and attracts young creatives.
- The Pikes Peak region will have fully implemented the 2010 Cultural Plan in order to increase economic vitality.

BUILT AND NATURAL ENVIRONMENT

BUILT AND NATURAL ENVIRONMENT

By 2030, the built and natural environments complement one another and reflect our commitment to enhance the lives of people by promoting community, culture, and commerce and preserving and protecting the natural environment.

- Built Environment – new construction, development and redevelopment; maintains existing infrastructure; beautiful and functional public realm
- Natural Environment - Regional ecological health, including ecosystems, habitats, and threatened, endangered, imperiled, and other species are protected, restored, and maintained.
- Air Quality – Healthy indoor and outdoor air quality with pollutants below regulatory thresholds.
- Water Quality - Ground and surface water quality is better than designated water quality standards....

ECONOMIC DEVELOPMENT

ECONOMIC DEVELOPMENT

By 2030, the region will have a strong and diverse economy that supports and benefits from sustainability.

- Grow the wealth of all demographic groups of the Pikes Peak region to sustain households and quality of life by increasing jobs, expanding the economic base, and increasing business profitability.
- Diversify the economy into multiple sectors to provide structural integrity, resilience, and innovation.
- Ensure the region has a strong, localized economy that reinvests in the region.

EDUCATION

EDUCATION

By 2030, comprehensive, affordable, life-long educational opportunities are available to all.

- All students have access to a 21st-Century K-12 education that prepares them for the future.
- Affordable, high quality, early-childhood care and education are available to all residents of the region to ensure school readiness.
- Regional higher education and professional and technical skills training are increasingly available and accessible to residents of the region.

ENERGY

ENERGY

By 2030, the region has made considerable progress toward 100% sustainable energy usage.

- Renewable Energy - 50% of energy consumed in the region is renewable and/or sustainable (2010 baseline)
- Energy Efficiency - Energy use in the region is reduced by 20% from a 2010 baseline (despite growth in population or commercial expansion).

HEALTH

HEALTH

By 2030, the region's population is healthy, long-lived, and has a good quality of life.

- By 2030, the Pikes Peak region ranks in the top 10 for the United States for individual and population health and well-being.

- By 2030, health and wellness care is accessible and affordable for every resident.

MATERIALS MANAGEMENT

MATERIALS MANAGEMENT

By 2030, the region has made significant progress toward a zero-waste future.

- There is a 70% reduction in solid waste sent to landfills.
- Household hazardous waste is minimized, managed, and properly disposed of...
- Individual, business, and government purchasing is guided by the tenets of reduce, reuse, recycle. All businesses and public institutions have developed and are choosing to follow sustainable procurement guidelines.

TRANSPORTATION

By 2030, the region has a sustainable, equitable, and affordable multimodal transportation system (roads, transit, bicycles, and pedestrian walkways) that efficiently and safely moves people and goods.

- Region financially sustains...infrastructure...
- Increased accessibility, integration, and connectivity...
- 50% fuel purchased in region is renewable and/or sustainable and transportation-related fossil fuel use is reduced by 40% from a 2010 baseline
- All transportation infrastructures are constructed, maintained, and operated using sustainable practices.
- There is decreased reliance on single-occupancy-vehicle modes of travel with public transit's share of trips increasing above 3%.

WATER QUANTITY

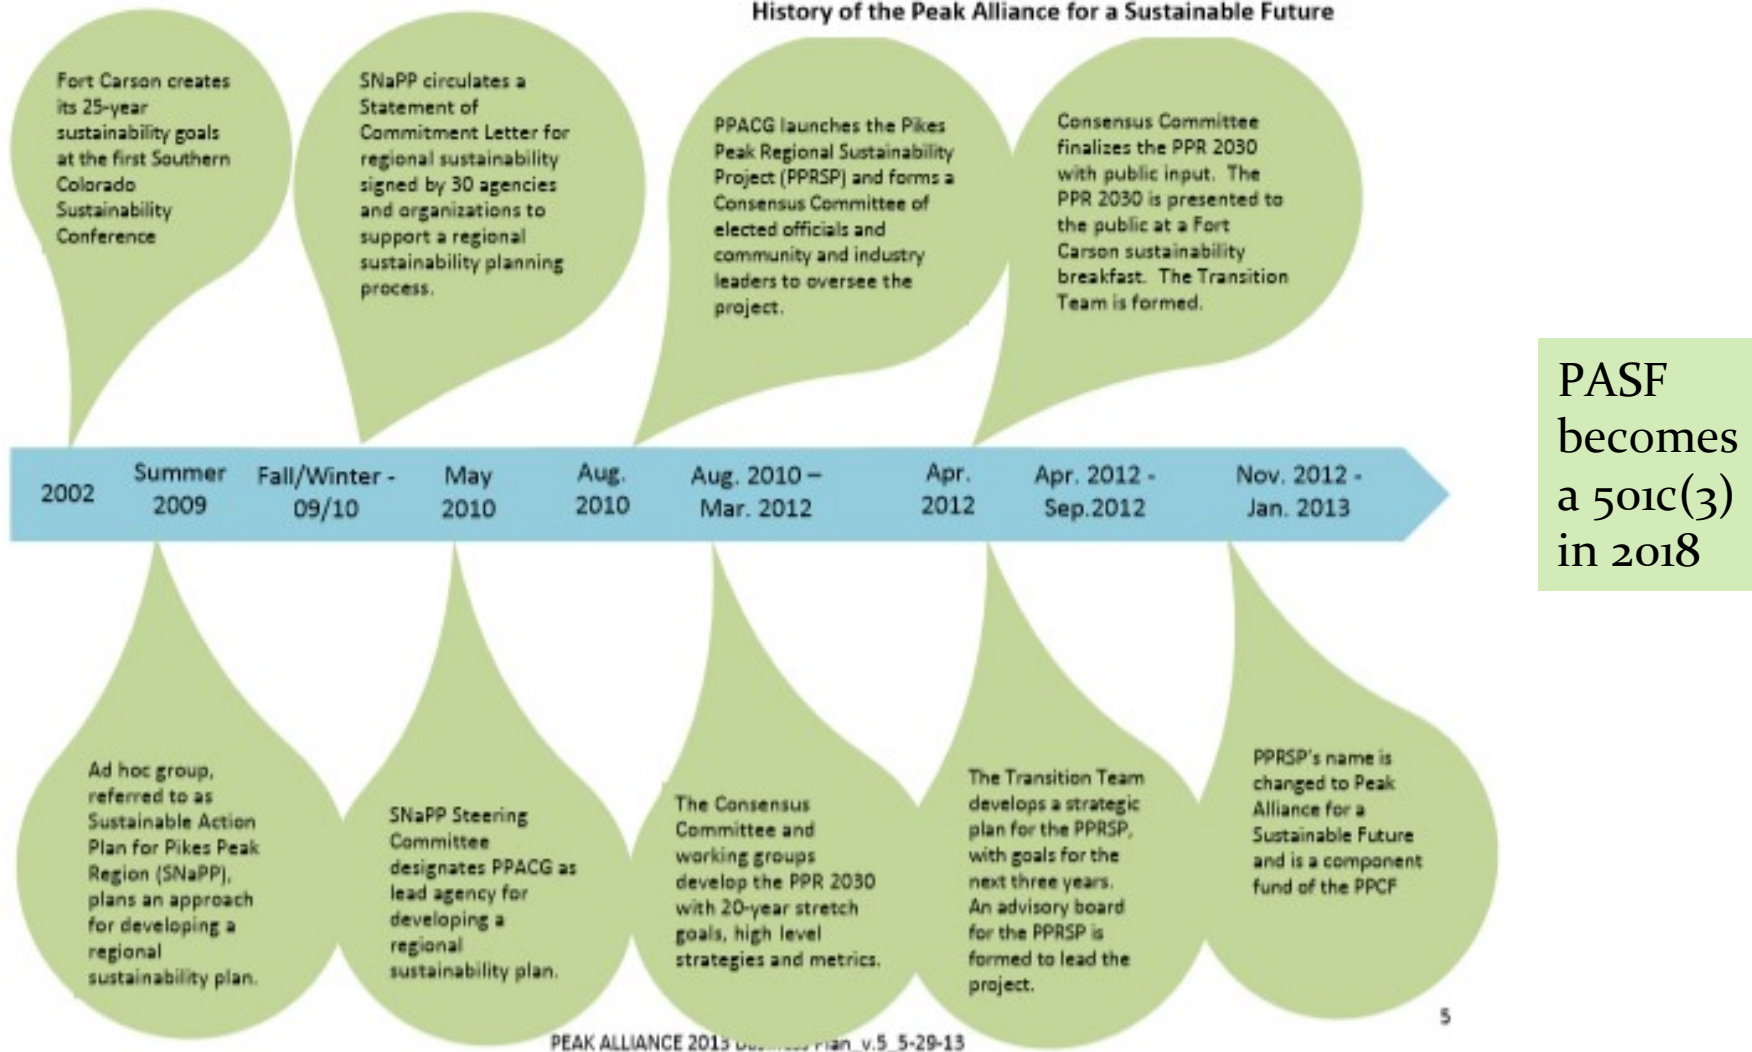

WATER QUANTITY

By 2030, the region's water use is met by currently-owned water supply and is as efficient as possible through application of best management practices.

- The region utilizes 100% of its reusable water supplies including but not limited to nonpotable water, water exchange programs, and transmountain water.
- Residential water use is at or below 80 gallons per person per day; 80% of commercial and industrial users in the region employ best water management practices.
- Landscaping for each intended use is resource-efficient.

History of the Peak Alliance for a Sustainable Future

PASF becomes a 501(c)(3) in 2018

Peak Alliance for a Sustainable Future

Mission: *Promote the economic, social and environmental vitality of the Pikes Peak region, by supporting “Looking to our Future – Pikes Peak Region 2030”. The 2030 document and 2016 Sustainability Report at <http://peakalliance.co/>.*

Areas of Emphasis:

- Agriculture
- Arts & Culture
- Built & Natural Environment
- Economic Development
- Education
- Energy
- Health
- Materials Management & Procurement
- Transportation
- Water Quantity

Board Members:

- Mary Barber
- Jane Ard-Smith
- Linda Kogan
- Christopher Aaby
- Brent Kennedy
- Sabrina Cotta
- Kate Reimer
- Mike Mazzola

Why support PASF?

Community needs for achieving PPR 2030 -

- Awareness & knowledge
- Involved citizens
- Connected people & organizations
- Innovation & creativity
- Funding tied to plans
- Action!

Who will benefit?

- Businesses
 - Government
 - Non-Governmental institutions
 - Community
 - People
- ...now & in the future

Web Site:
<http://peakalliance.co/>

Programs & services offered -

- Grow awareness of sustainability & the PPR 2030
- Teach the value & fundamentals of sustainability
- Inspire action to achieve goals
- Cooperate with other agencies & organizations
- Communicate to tell our stories, celebrate successes & share lessons learned
- Collaborate to bring partners and resources together to put sustainability into practice
- Motivate & guide leaders, employees & citizens
- Demonstrate new & innovative technologies & processes
- Promote actions leading to a resilient, sustainable community, environment & economy
